MALAYSIAN YOUTH ARCHITECTURE SYMPOSIUM (MAYAS) 2017:

1.0 Introduction

THEME: REAWAKENING | ACTIVATING THE YOUTH

Architecture and Design is the ever expanding field which often encompasses the multi-disciplinary and the collaborative of specialists. Hence, one of the greatest challenges of a young architect is to continue pushing the boundaries of design and understanding the dilution of the boundary with other arts in the modern era. In current times, the Architect must seize to extend themselves beyond the defined boundaries of conventional practice. It is the transient to be innovators and charter new practice typologies as a continuous resilience strategy within the design-built field and skill-based discourse.

2.0 Objectives:

1. Discourse on current and ongoing architecture practice, issues and concerns affecting young professionals. (graduate architects/ researchers);
2. Career Development, and Leadership Training talks in advancing the career progression thinking for young professionals;
3. A platform provided by PAM focused at Young Graduates/ Architects /Built Environment Professionals / Designers and Researchers in Malaysia to meet and network.

With this in mind the MAYAS 1.0 has created a symposium of workshops and lectures presented by numerous artistic disciplines with the idea of how the sharing of knowledge can help to understand the benefits of collaborative industry.
